

Jorvig Consulting, Inc Commences Operations Providing Consulting Services to Eliminate Surprises in New Product Development Projects.

Jorvig Consulting, Inc. begins operations in Chandler, AZ. Jorvig Consulting is a provider of communication based consulting services that allow product development organizations to exceed typical project expectations. Services are delivered through conventional consulting arrangements as well as formalized training in their methods.

Chandler, AZ (PRWEB) December 10, 2004 - Jorvig Consulting, Inc. has commenced operations in Chandler, AZ providing design team support to eliminate the unexpected in new product development efforts. The services provided focus on ensuring solid communication mechanisms are in place between all disciplines on the development team.

"The emphasis of our services is on the development of a Design Process Manager as part of the design team; something that is not a standard practice with teams today." said Jeff Jorvig, President of Jorvig Consulting, Inc. This role frequently may not formally exist, or is assumed to be the technical management individual. The Design Process Management role is to ensure that the design process is flowing well and is being managed for success. This individual must know the nuts and bolts of the design process and should be experienced in design. A program manager for the overall project will typically not possess the skill set to act as the Design Process Manager.

Communications is the key to successful project execution and that is the skill-set that Jorvig Consulting provides. "We Deliver Freedom from Surprises" says Jorvig. Surprises should not be assumed to be the norm in your projects. They can be greatly reduced with the proper communications in place.

About Jorvig Consulting, Inc.

Jorvig Consulting was incorporated in July of 2004 with a primary focus on enhancing design teams effectiveness.
