

Delivering Freedom from Terminal Sameness

March 2, 2011

TESTIMONIALS

"We engaged with Jeff to tailor a workshop for our design team to help identify the critical areas of our design process that needed to be improved in order for us to achieve greater predictability and timelier execution to schedule and budget. Jeff delivered on everything he promised in an engaging and thought provoking all day session. Rather than just giving a one-way lecture, he was able to draw the team into discussion through small group breakout exercises to help the team feel and understand the issues. Our time with Jeff was very worthwhile and valuable."

Top Qualities: Personable, Expert, High Integrity

Marshall Laccoff
Sr.VP/General Manager
TLSI, Inc.

"Jorvig Consulting Inc.'s seminar on design execution is an excellent overview of the important issues that product development teams face in IC development. The seminar specifically addresses key areas such as managing the product definition process, risk management, and IP reuse. Jeff Jorvig is a knowledgeable presenter and was able to answer the design teams detailed questions."

Greg Waterfall
Product Line Director
Texas Instruments

"Jorvig Consulting has been involved in a design process improvement project within our organization. He managed and executed the project exceptionally. The cross-functional project team that Jeff recruited was assembled quickly and has produced results that hit the mark. We are grateful for the work that Jorvig Consulting has performed and would make a high recommendation."

Dave Monk
Operations Manager
Freescale Semiconductor

3165 S Alma School Rd. Suite 29-152

Chandler, AZ 85248

Office: 480-895-0478 Fax: 480-699-4960

“Jorvig Consulting executed to every milestone agreed upon and was flexible when milestones would change due to internal structural changes. Each complex problem was broken into simple methodologies that provide a foundation for future design projects. Jorvig Consulting was able to work within the current system but still provided needed change for future growth.”

Todd Miller
Design Manager
Freescale Semiconductor

“Jeff created a design process where none existed. The process included peer reviews, top-down design, and complete documentation. This is usually an impossible task with analog design engineers. Jeff was able to corral these engineers into an effective team with constant subtle pressure and without alienating them.”

Marshall Bell
Analog Designer
National Semiconductor

“I engaged Jeff Jorvig on mixed-signal designs for advanced display applications, and Jeff’s ideas regarding design process management are spot-on. Over the years, I’ve seen numerous instances of design team members working diligently on their tasks, only to find that their work was invalid or needed to be repeated because they simply did not understand how their deliverables related to the bigger picture.”

“Jeff’s process oriented approach to complex designs has been successful in greatly reducing product development surprises by insuring that a process was put in place to govern how the design proceeded through the various stages of definition, architecture, design, simulation and validation. There are many “right” ways for things to be done; the design processes Jeff implemented insures that everyone on the team is doing their design work the same “right” way.”

Gerry Harder
Product Line Director
National Semiconductor

“Jorvig Consulting worked with us to tailor a half-day workshop to our specific needs. Rapid response and flexibility are just the things needed in a fast-paced development environment.”

Carlos Acosta
IC Design Manager
Medtronic
